# Introduction

## The Finance World Before DeFi

The antiquated financial ecosystem is beset with inefficiencies that have impacted its performance and credibility.

Regardless of the quality services offered by a banker, it is likely that they miss market hints and expose your financial assets to inconceivable risk. This can further lead to inevitable losses.

Moreover, the conventional finance ecosystem is inaccessible to many individuals and thereby prevents a large pool of investors from tapping into primary markets. As a result, excessive dependency upon capital investors has restricted their socio-economic impact.

# The World With Decentralized Finance

DeFi is an opportunity for finance services providers to take a leap, embrace decentralized Blockchain development and undergo an overarching reincarnation of their products. Using open-source protocols to conceive enterprise-grade solutions, DeFi solutions empower investors gain complete ownership of their assets and trade them in a transparent environment.

To put it simply, financial engagements on DeFi are driven by automated Smart Contracts built by code. Therefore, the model extracts all the benefits of a Blockchain environment with a finance spin.

Improving access to major finance services such as lending / borrowing, trading and market making,

DeFi can potentially aid millions of unbanked people. That means, all you need is an internet connection to drive your monetary functions without depending upon anyone.

Consider lending loans to any borrower in the world minus the interference of banks or regulatory bodies. This is a classic use case that ensures drastic reduction in interest rates and wider reach.

## What is Timon Finance?

Timon Finance is a BSC20 token created to operate in a business ecosystem Applications for global trading and the basic daily life of the title holder transaction needs. The Timon Finance Coin is launched with the pure vision of Being available, usable and valuable to everyone.

# Protocol

## 100% Community Driven

We are 100% community driven: Fair launch, locked LP and the biggest burn in history.

## Static Rewards System

Users can earn Timon tokens simply by holding coins in their wallets. 5% of fees on each transaction go directly to the holders, while another 5% is auto-locked to liquidity.

## Limited Supply

50% of TMN will be burned after launch, removing them from circulation. Timon continues to burn coins, so the number of coins in circulation will only continue to be reduced over time.

# Protocol

## Secure & Immutable

Timon is smart contract-based crypto which uses the BEP-20 interface, making it secure and immutable.

## Investment Projects

The Timon team has many other projects in line for its investors, decentralized exchange, called TimonSwap, coming in the near future.

# Features

Nullified risks & frauds.

Total ownership of assets to the users.

Better interoperability between stake holders.

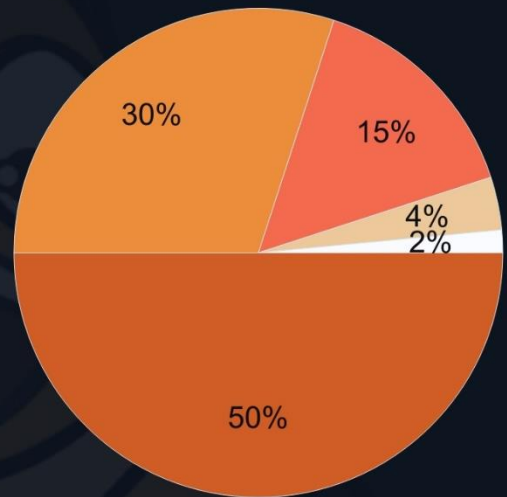

Lightning node network enabling unlimited transactions.

Deep rooted customer loyalty and lasting associations.

# TMN Token

Total Supply 1,000,000,000,000,000

Burned	50%
Community	30%
Team	15%
Marketing	4%
Advisors	2%
